Open Zotero and select the source you want to create a citation for

The screenshot shows the Zotero application window with the 'Edit' menu open. The 'Copy Bibliography' option is highlighted in green. A red callout box with white text points to this option, stating: "Select 'Copy Bibliography' from the Edit menu".

The main window displays a list of items in the 'Cannabis' collection. The selected item is:

- Title: Cannabis use and depressive mood in adolescence: The mediating/moderating effect of anxiety, cannabis effect expectancies, and peer use
- Author: Schmits, Emilie
- Journal: Journal of Child & Adolescent Substance Abuse
- Volume: 27
- Issue: 5-6
- Pages: 322-333
- Date: September 2018

The 'Info' panel on the right provides detailed metadata for the selected item, including DOI (10.1080/1067828X.2018.1519666), ISSN (1067-828X), and the publisher (Taylor & Francis).

Annotated Bibliography (based on your selections from the list)

1. Jones, J., Goodenough, I., and Brown, P. (2014). Pot and your cat. *Cannabis Issues*. Vol 1(4) pgs. 12-46. Recently articles have been written about how animal products with cannabis may be an emerging market. This longitudinal mixed methods study looked at 250 households with cats in Nowhere, Ontario. Of these, 45 said they used pot regularly, and grew their own plants. Only 5 % said they gave their cats pot to eat. The study found that cats who ate pot were less annoying, purred more and ate all the other food in their bowls. Animal rights groups are divided on whether or not cats should eat pot, because the long term effects are not known. Catnip producers are at a loss as to how to respond to this research.
2. Hathaway, A, (2014). *Drugs and society*. Toronto: Oxford. This book uses a social constructionist approach to understand how drugs are conceptualized over time by -powerful regimes of truth—governments, moral entrepreneurs and so on, that are able to control laws and social sanctions about the use of drugs. Cannabis laws, and the Cannabis Act in Canada, then are understood as resulting from the historical contests between groups with specific interests who try to control how we think about pot use to their own advantage. Claims making by groups with interests in cannabis is the key.
